

Doctor of Data (PhD)

Introducing Mitra, a proficient Data Scientist with a versatile skill set encompassing SAS, SQL, R, Python, Google Analytics, and Azure. Mitra's expertise lies in extracting actionable insights from complex datasets and transforming them into strategic opportunities.

Leveraging advanced analytics tools like SAS and SQL alongside programming languages such as R and Python, Mitra adeptly navigates through data to drive informed decision-making. With Google Analytics, Mitra provides detailed web analytics to optimize online performance. Additionally, Mitra harnesses the power of Azure to manage and analyse big data in the cloud, delivering scalable solutions that meet modern business demands.

Mitra's technical prowess is matched by a keen analytical mind and a knack for solving intricate problems. Whether it's setting up automated data pipelines, performing sophisticated statistical analyses, or visualising data for stakeholders,

Mitra ensures that data-driven strategies are at the core of every project.
